SUMMARY

Aspiring Software Developer with full-stack experience in building scalable web applications using React.js, Node.js, Express.js, PostgreSQL, and Redis. Strong problem-solving skills with emphasis on backend logic, data handling, and performance optimization. .

PROJECTS

CollegeAssist – React.js, Tailwind CSS, Node.js, Express.js, PostgreSQL, Redis, RabbitMQ, Docker, Cloudinary, Gemini 2.5 Flash API

- Built a fully authenticated microservices-based system for synchronizing student and teacher data from external college databases.
- Leveraged **Gemini 2.5 Flash API** to automate direct data conversion and structured output generation, reducing manual processing effort.
- Designed a normalized **PostgreSQL** schema and implemented **UPSERT** and transactional workflows for consistent data sync.
- Developed role-based APIs for student profiles and teacher timetable management.
- Integrated **Redis** for caching and **RabbitMQ** for asynchronous processing to improve scalability.
- Containerized services using **Docker** and built frontend with **React.js** and **Tailwind CSS**.

FinSight – React.js, Node.js, Express.js, PostgreSQL, Redis, Tailwind CSS, DaisyUI

- Architected a full-stack financial data analysis platform supporting CSV and Excel uploads with schema-less ingestion.
- Designed a dynamic normalization pipeline to transform heterogeneous raw file structures into a unified transaction model optimized for analytics.
- Built an interactive analytics dashboard using **React.js**, styled with **Tailwind CSS** and **DaisyUI**.
- Implemented secure authentication using **JWT**, **HTTP-only cookies**, and proper **CORS** configuration.
- Applied production-grade practices using **Helmet**, **Morgan**, **Zod**, **Zustand**, and **Axios**.

Progressify – React.js, Node.js, Express.js, MongoDB

- Built a full-stack goal and productivity tracking platform with task creation, prioritization, and daily logs.
- Designed scalable backend using User, Task, and DailyLog schemas with proper relational mapping.
- Implemented JWT-based authentication and authorization for secure user-specific access.
- Used **Joi** for server-side input validation and **React-Toastify** for real-time UI feedback.
- Configured **CORS** for secure frontend-backend communication and built a responsive dashboard UI.

IIIT Flow – React.js, Express.js, PostgreSQL

- Built **Enterprise Document Management approval Platform** with user authentication, role-based workflow with Student, Faculty and Admin portals, and status dashboard.
- Designed scalable backend routing logic. Developed robust APIs and comprehensive frontend .
- Implemented User Authentication and Authorization allowing only user with suitable permissions to create, forward, reject Tasks.

EDUCATION

IIIT Bhubaneswar

Bachelor of Technology in Computer Engineering

Bhubaneswar, Odisha, India

2022 – 2026

Relevant Coursework

Data Structures, Design and Analysis of Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks.

TECHNICAL SKILLS

- **Programming Languages:** C, C++, HTML, CSS, JavaScript, Python.
- **Frameworks & Libraries:** Node.js, Express.js, React.js, Tailwind CSS, DaisyUI.
- **Tools & Technologies:** Git, GitHub, Postman,
- **Databases:** MongoDB, PostgreSQL, Redis
